

Circle CI integration:

The CircleCI builds, and updates DockerHub with the latest docker image of our frontend.

Proof that the build worked:

First on the circleci-integration branch

Dashboard Project Branch

All Pipelines > A-Slight-Sep-Up > circleci-integration

**A-Slight-Sep-Up** [Add team members](#) [Edit Config](#) [Run Pipeline](#) [Project Settings](#)

Filters: Everyone's Pipelines A-Slight-Sep-Up circleci-integration Auto-expand ☒

Pipeline	Status	Workflow	Branch / Commit	Start	Duration	Actions
A-Slight-Sep-Up 18	Success	my-workflow	circleci-integration 35e75c3 Update config.yml	4m ago	3m 41s	<a href="#">Refresh</a> <a href="#">Cancel</a> <a href="#">Close</a> <a href="#">More</a>
Jobs					3m 38s	
build 18						

Proof it works on Develop, our current branch we're working on.
