

Project Sprint Planning Notes

Team: up-sep

Sprint: 3

Date: 11/10/2021

Attended:

Scrum Master: Timothy Tran

Product Owner: MD

Development team: Nandini Nair, Victoria kokurin, noel matthews, kyriec dam

1. Goal

Implement request microservices, complete outstanding sprint 2 user stories, continue refining, refactoring and building on prior implementations.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

-  MP-42 As a user, I want to search for book titles so that I can rate it and write a review
-  MP-17 As a user, I want to search up authors so that I can buy more books written by that author
-  MP-36 As a user, I want to identify books in a certain category, so that I can find books relevant to my interests
-  MP-35 As a logged-in user, I want to list my book for sale, so that other users can purchase it
-  MP-31 As a user, I want to view the books table of contents, so that I can gauge whether its suitable for me
-  MP-37 As a user, I want to look up a book by its ISBN, so that I can quickly and accurately find the specific book I am looking for
-  MP-34 As a user, I want to contact the admin team, so that I can ask questions about signing up.
-  MP-41 As a paying customer, i want to use paypal for payment, so that i can used my saved details

The group's vision for this sprint is to have the website operate with book functionalities including book requests and book listings. This means extra backend work implementing book request and listing databases and updating previous features. We would also like to implement Paypal API. Some big challenges ahead, but we've got this.

4. Estimation in story points

User story	effort	justification
As a user, I want to search for book titles so that I can rate it and write a review	13	Requires new search logic, time consuming build plus displaying results based on the search query
As a user, I want to search up authors so that I can buy more books written by that author	13	As above
As a user, I want to identify books in a certain category, so that I can find books relevant to my interests	3	Display book based on matching category query
As a logged-in user, I want to list my book for sale, so that other users can purchase it	6	New microservice but should be an extension of previous book implementations as a guide
As a user, I want to view the books table of contents, so that I can gauge whether its suitable for me	5	Extension of viewing the book details
As a user, I want to look up a book by its ISBN, so that I can quickly and accurately find the specific book I am looking for	3	Basic search by ID to return a book. Simpler than search by string.
As a user, I want to contact the admin team, so that I can ask questions about signing up.	5	Form fillout
As a paying customer, I want to use paypal for payment, so that i can used my saved details	20	Brand new implementation and something we have not done before. Will take time.
